

True to Life, Natural Colour

Vision 35™ emits a neutral white light. This 3500 kelvin, 86 CRI lamp feels natural therefore pleases the masses. High in yellow/orange light, it accentuates wood grain and earth tones. Vision 35™ offers exceptional lighting for executive offices, conference rooms, reception areas, boardrooms and all general office lighting. The 35 K lamp is now the most popular fluorescent lamp for T8 and T5 users. This superior quality and high CRI lamp makes skin tones appear natural and shows colours accurately. Because the 3500K lamp is very soothing, it's the colour temperature that has become the most requested. It's a warm and natural lamp, easiest on our eyes and after long work hours its pleasant to work under. 3500 Kelvin; half way between the 30K warm white and 41K cool white lamps, gives us the best of both worlds !
