

## Clean, bright daylight colour

Vision 65™ is strong in blue and green hues. This 6500 Kelvin 85 CRI lamp is used to improve lighting in factories and industrial buildings. Replicating the brightness of daylight, this fluorescent lamp portrays colours very accurately. Vision 65 fluorescent lamps enhance the appearance of products in retail applications. Often used as a more cost effective alternative to a retrofit program to raise light levels in office spaces and industrial applications. Vision65™ is the lamp of choice if you need or prefer brightness. Available in T5, T8, and T12 fluorescent lamps & come in 2 - 8 foot lengths. This is the blue white "bright" light source.
